

TATAMI MODERN STYLE

Sekisui Migusa tatami catalog

Tradition meets technology

The perfect blend of functionality and design elegance
Migusa—tatami for the modern era

The traditional Japanese lifestyle at floor level still has tremendous appeal in the modern world. Tatami mats provide a living, breathing floor surface that rewards the user with a sense of comfort, convenience and safety. At Sekisui, we take pride in supplying tatami mats that are steeped in tradition yet at the same time designed to blend into the modern housing environment, augmenting the inherent qualities of the traditional tatami mat with new concepts in comfort and aesthetics. The Migusa tatami mat from Sekisui achieves an ideal balance of tradition and innovation, providing every home with a perfect focal point for family life.

MIGUSA
SEKISUI TATAMI

Migusa from Sekisui Made in Japan— your guarantee of quality

Integrated production system

The Migusa tatami series is produced at ISO9001 and ISO14001 certified facilities within Japan under the Sekisui integrated production system that maintains stringent quality standards throughout the production process, from inspection of raw materials and product manufacturing through to final delivery. Sekisui has established a deserved reputation for quality and excellence among a broad range of clients including residential construction firms, tatami retailers, design studios and furniture suppliers.

Uncompromising dedication to quality

Sekisui molding factories employ a variety of plastics technologies including extrusion molding, blow molding, stretch molding and ultradrawn forming developed for production of plate sheets, containers and packaging materials. As a leading supplier of plastics products, we are committed to delivering maximum value to customers in the form of cost-effective solutions tailored to the demands of the marketplace.

Helping the environment

A key part of our mission at Sekisui is to create harmony with the natural environment and social spaces. Migusa series tatami is made from safe, environmentally friendly materials, free of formaldehydes and other substances associated with Sick Building Syndrome. Sekisui products will not generate toxins or other toxic by-products if burned, and are designed to reduce global warming with minimal environmental impact throughout the life cycle from development and production through to delivery and installation. The Migusa tatami series symbolizes the Sekisui commitment to a more sustainable society.

Izumo Brand accreditation

Izumo is the town of the Yao-yorozu gods that forms the backdrop to ancient Japanese texts such as the Kojiki and Nihonshoki. Izumo Brand is an industry initiative designed to boost production and identify markets for unique products both at home and overseas. Migusa tatami has been accredited as a product that will help to raise awareness and recognition of the Izumo Brand.

What is
Migusa?

Migusa is a new type of tatami developed by Sekisui that delivers modern-day functional performance while retaining the authentic texture and feel of all-natural mat rush.

Migusa is a unique product made from traditional mat rush together with a specially developed plastic containing inorganic calcium. The mat rush delivers the authentic texture and feel of tatami matting while the plastic component enhances durability, improves product safety and allows greater flexibility of design and color schemes.

■ The advanced plastic component of Migusa mimics the structure of natural mat rush fiber.

■ The ratio of additive governs the natural mat rush texture and moisture absorption performance.

Comfort

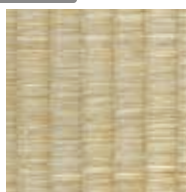

Simple,
convenient,
easy to keep clean

Point 01 Will not fade or discolor

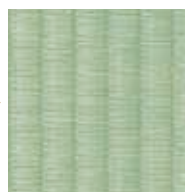

Maintains its appearance

«Test pieces were exposed to direct sunlight for two full years in an outdoor setting.»

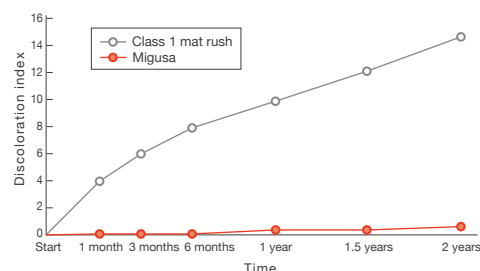

Conventional mat rush tatami

Migusa tatami

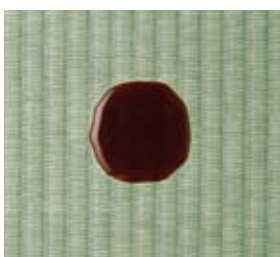

Conventional mat rush tatami suffered extensively discoloration over two years, while Migusa remained virtually unchanged.

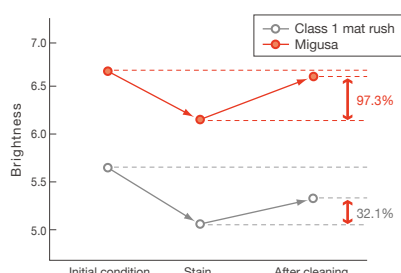

Point 02 Resists staining from water and other liquids

Easy to keep clean

Migusa boasts virtually 100% stain resistance and is easy to keep clean compared to conventional mat rush tatami.

Simply wipe with a damp cloth.

Conventional mat rush tatami has a cleaning ratio (the level of brightness that remains after cleaning) of just 32.1%. Migusa has a cleaning ratio of close to 100%, illustrating how easy it is to keep clean.

Point 03 Resists splitting and fluffing

Durable and long-lasting

Migusa fiber lasts far longer than conventional mat rush, with minimal degradation over time and excellent resistance to common problems such as strand splitting. Product replacement intervals are therefore much longer.

«Test pieces were subjected to strictly controlled friction tests. Friction was applied in the fiber weave direction.»

Migusa exhibits exceptional strength and durability compared to conventional mat rush. It resists cracking and does not generate dust.

Test results	
Mat rush	30+ strands split
Migusa	No cracking

Safety

Better for the environment, better for you.

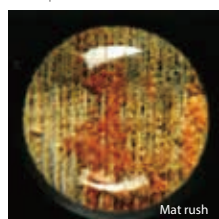

Point

Clean and hygienic

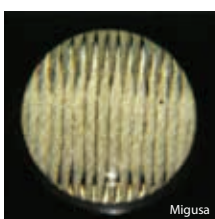

04 Health benefits from improved resistance to mold and mites

A surface used for everyday activities such as sitting and folding clothes should be clean and hygienic. Migusa boasts improved resistance to mold and mites and is recommended by the Japan Atopic Dermatitis Patients Association.

«Test pieces were coated with bacteria then maintained at 28°C and 97% humidity.»

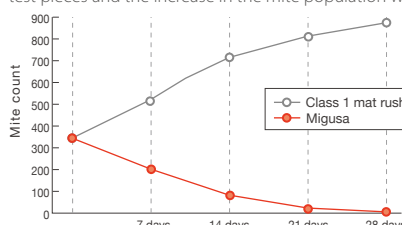

Mat rush

Migusa

Mold began to appear on the mat rush test piece after ten days and had covered the entire surface within 28 days. Meanwhile, Migusa showed no evidence of mold even after three months.

<0.2 g of Tyrophagus Putrescentiae mold mites was added to surface water on the test pieces and the increase in the mite population was monitored.>

Mites breed by eating through mat rush. On the conventional mat rush test piece, the mite count increased steadily. On the Migusa test piece, the mite count declined to undetectable levels within four weeks.

Point

Non-toxic

05 Migusa does not contain any substances associated with Sick Building Syndrome

Migusa does not contain or emit any Sick Building Syndrome substances. It is totally free of formaldehyde, considered a major indoor pollutant.

<Formaldehyde emissions test>

Test results

Emissions below quantitative threshold

Methodology: Sampling chamber test as per JIS A6921 Appendix 1

E0 compliance: Test results for Migusa indicate negligible health impacts in sealed internal spaces.

Point

Supportive

06 Migusa cushions the feet while providing a sturdy non-slip surface—ideal for children and elderly people

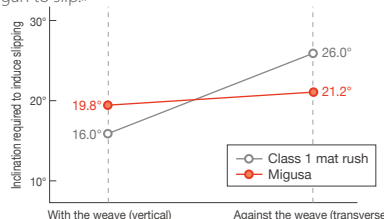

Migusa has the same sponge-like structure as conventional rush mat, offering support underfoot as well as cushioning in the event of a fall.

«A 4kg weight inside a nylon sock—equivalent to a 60kg person—was placed on each test piece. The inclination of the test pieces was gradually increased until the weight began to slip.»

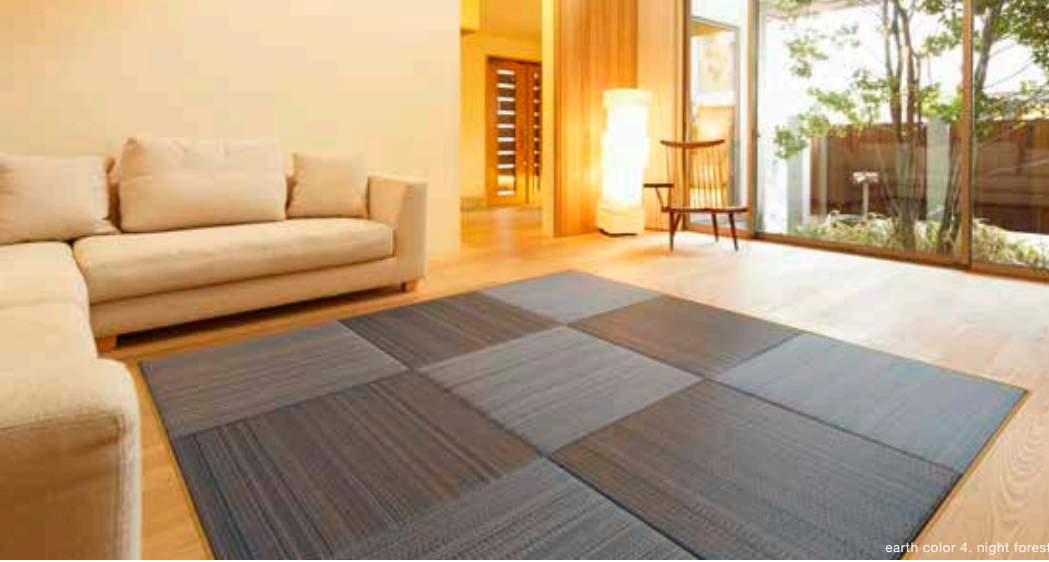

Cross-section of strand

Air pockets provide cushioning

Tatami is generally held to be somewhat slippery in the direction of the weave (vertical). The tests showed that conventional mat rush is more slippery than Migusa in the vertical direction and less slippery in the transverse direction. Migusa offers slip resistance in both directions, for a better overall balance.

Design

Infinite possibilities

Taste

Interior design

Migusa tatami mats can be configured in 41 different combinations of color and weave, enough to ensure a perfect match for every environment.

Traditional tatami matting updated for modern life

Bringing the benefits of tatami into your home

Traditional Japanese tatami has many benefits. It adds a sense of warmth to the home.

It has a unique feel and texture. It creates the ideal space for relaxing.

Tatami can be tailored to the space and function of any room in the home.

The Migusa series from Sekisui is available in a wide range of traditional and modern patterns and colors designed to suit traditional Japanese rooms as well as modern Western-style living and dining rooms and child bedrooms.

Migusa from Sekisui is tatami for the modern era.

1 Japanese rooms

A uniquely Japanese space

Only a tatami room with a traditional low table provides that wonderful sense of welcome to a guest in your home. A space in the floor below the table can be provided for those who are not used to sitting on the floor in the traditional style.

ICHIMATSU – Green

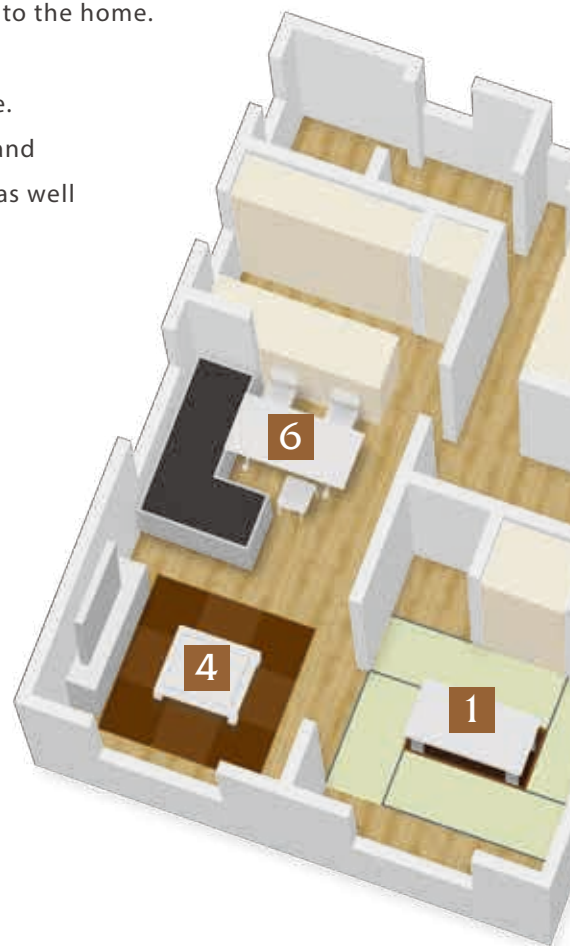

2 Private space

Adding a distinctive Japanese touch to any room

Tatami mats can be used to give a Japanese flavor to the more private rooms of the home. In today's busy stressful lives, it is important to create a haven within the home for unwinding. A tatami floor provides the perfect relaxing space for reading, watching television or indulging in hobbies such as flower arranging.

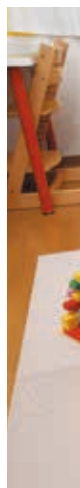

MESEKI – Gray

3 Children's rooms

A safe and hygienic play area that stimulates the senses

Children need their own spaces for optimum development. Migusa tatami is perfect for growing children; it provides protection against mold and mites and is easy to maintain and keep clean. Simply lay it out on the floor to create a dedicated play area or a surface on which to roll out the futon at night.

4 Living room

A Japanese-style living room draws the family together

The tatami living room provides a family-oriented space for stretching out and relaxing with a book or in front of the television, or even an afternoon nap. A tatami space naturally draws the family together in a circle and helps to create happy family memories.

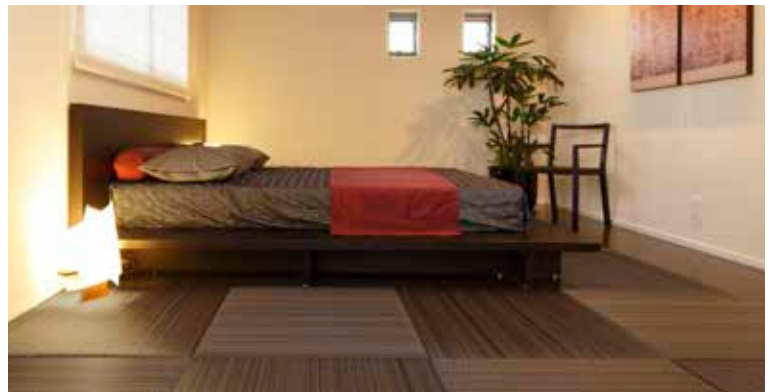

MESEKI – Brown

5 Bedroom

Warm and comforting for bare feet

The bedroom is an important space for relaxing and rejuvenating after a hard day. Unlike hard floors, Migusa tatami mats provide a stimulating texture that reinvigorates the soles of the feet and promotes relaxation.

earth color 4 . night forest

6 Dining room

A place for shared stories and laughter

The dining room is a place where several generations of the family can come together for meals, with a Western-style dining setting complemented by a raised section finished in traditional tatami. The dining table is also a place for family and guests to enjoy meals together.

MESEKI – Black

MESEKI - Pink

For the living room—
the central focus of the home

earth color collection

A welcoming and relaxing space
for the family to gather together
for fun and laughter

The Migusa tatami earth color collection from Sekisui is an all-new range of colors designed specifically to enhance the tatami section of the living room, a welcoming space that invites relaxation and enhances the home. The stylish colors and interior aesthetics of the earth color collection transcend conventional notions of the tatami and usher in a new fusion of tradition and modern style.

Adding functionality, creativity and beauty to a traditional Japanese room, with a wide choice of colors

HIKIME - Green

Enhancing the performance of mat rush materials without compromising the fundamental warmth and texture

The Migusa range of installed tatami mats

The Migusa range aims to augment the distinctive qualities of mat rush fiber (particularly in regards to natural warmth, texture and moisture absorption) with improved functionality in key areas such as durability, hygiene and color variability. The Migusa range opens up new possibilities and ushers in a new era for the cherished tradition of the tatami mat.

Individual strands are carefully woven together in a painstaking process that complements the characteristic texture of the tatami mat with innovation such as color and patterns.

Tatami matting in roll-up form is the ultimate in convenience. Create an authentic Japanese space in an instant with no installation or adjustment required—the perfect solution for schools, evacuation centers and many other settings. In addition to the tatami look and feel, the foam underlay provides gentle cushioning.

Ready to use in just 20 seconds

Pattern	Colors	Tatami size (width mm x length m)	Recommended retail price (tax not included)

Tatami mats specially designed for floor heaters—bringing extra warmth to a Japanese room

HIKIME - Green

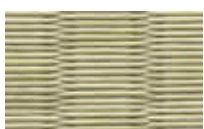

Until now, tatami matting has never combined well with floor heating systems, due to issues with thermal conductivity, dimensional consistency and durability. Sekisui has developed an ultra-thin tatami mat designed for use with in-floor heating systems. Measuring just 12 mm in thickness, it features a special high-conductivity core for optimum thermal transfer along with the same high-quality Migusa surface layer.

* Measured values

HIKIME - Green

HIKIME - Leaf green

HIKIME - Yellow

Compatible with hard panel and sub-floor hydronic heating mats

Required installation: with tatami surface and core materials

Product		Tatami Size	Price including standard installation (tax not included)
Koharu	Gohachi	880 mm x 1.76 m x 12 mm	¥25,000
	Honma	957 mm x 1.91 m x 12 mm	¥28,000

Materials

Migusa surface layer: polypropylene and calcium carbonate
Core: plywood and aluminum board
Internal padding: polyester nonwoven fabric

Not available in borderless configuration

Must be installed by a Sekisui-approved installer as listed on the Sekisui website.
Product specifications at http://www.sekisui-migusa.jp/products/koharu_spec.html

Custom orders are accepted for any color combinations. **Allow approximately two weeks for shipment.**

Note

- All products are made to order. A products are shipped within approximately two weeks. For B products, lot sizes and delivery times are negotiated separately.
- Please allow extra time for delivery during the summer holiday and New Year periods.
- Delivery may take longer due to weather conditions or in remote areas.
- Custom orders may not be cancelled, modified or exchanged once the order is accepted.

Room layout

Tatami mats can be used to add warmth and elegance to a variety of different settings, from spacious living rooms to more intimate private spaces.

FLOOR TATAMI [Tatami floor mats]

The ultimate combination of design and functionality

**GOOD
DESIGN**

Good Design Award

The prestigious Good Design Award was bestowed on the Migusa series in recognition of the application of advanced plastics technology to develop exciting new markets for the traditional tatami mat. In particular, the use of plastics addresses several limitations of traditional mat rush tatami (mainly quality and durability) and enables a wider range of colors designed to suit Western-inspired home interior styling.

2008 winner: Migusa tatami and tatami floor mats,
Koharu tatami for in-floor heating

2009 winner: Migusa tatami and Allergy Buster tatami
floor mats

**KIDS DESIGN
AWARD**

Kids Design Award

The Kids Design Award was presented to Sekisui in recognition of a product that is easy to maintain and helps regulate humidity, thus providing a safe and hygienic environment at floor level for children and babies.

2010 winner: Industrial Migusa series

2012 winner: Tatami roll

Japan Atopic Dermatitis
Patients Association
Recommended product
S 608700 A

Recommended by the Japan Atopic Dermatitis Patients Association

The Japan Atopic Dermatitis Patients Association (a designated non-government organization) has officially recommended the Migusa series for atopic dermatitis and allergy sufferers. The Association has also commended Sekisui for its work on boosting awareness and understanding of dermatitis and allergies as well as treatment of associated conditions.

Migusa series

IZUMO BRAND

Izumo Brand accreditation

The accreditation of Migusa tatami recognizes a unique product with the potential to resonate in domestic and overseas markets, where adding production capacity and identifying markets will help to boost recognition and awareness of the Izumo Brand.

Migusa series

Functional and performance characteristics

Allergy Buster® logo

Denotes products designed to minimize the impact of allergens such as pollen, mite excreta and dead mites and provide a safe and hygienic indoor environment.

* Allergy Buster® is a registered trademark of Sekisui Chemical Co., Ltd.

F★★★★ logo

Standardized logo based on voluntary industry standards on VOC (formaldehyde) radiation developed by the Interior Fabrics Performance Evaluation Conference. F★★★★ is the highest level.

Flame resistant logo

Appears on products certified by the Japan Fire Retardant Association as meeting the required fireproof standards.

**Needs
installation**

Installation required

Denotes products that require specialized installation by a retailer or contractor.

**Custom
color**

Available as custom order

Denotes products that are available in non-standard colors (see pages 16 and 28).

**83_{cm}
square**

83 cm square standard size

Denotes tatami mats in 83 cm square configuration.

**In-floor
heating**

Compatible with in-floor heating system

Denotes products that are compatible with an in-floor heating system.

Cleaning and maintenance

Take care to keep your Migusa product clean and well maintained to ensure many years of service.

General

- The product itself is highly resistant to mold and mites. However accumulated dust, stains and moisture can in some circumstances act as nutrients for mold and mites. It is important therefore to keep the product clean and well ventilated.
- For best results, operate the vacuum cleaner in the direction of the weave.

Cleaning

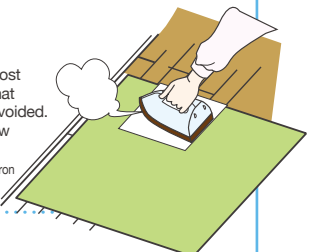

- Stains such as soy sauce, sake and fruit juice should be wiped off as quickly as possible.
- For oil stains, remove as much as possible with a tissue then wipe clean with a damp cloth and a small amount of neutral detergent.
- For stubborn stains, brush gently in the direction of the weave with a toothbrush or equivalent, then wipe clean with a damp cloth.

Preventing damage

- Migusa is resistant to damage and deformation in most situations. For best results, however, sharp pieces that exert concentrated force on the surface should be avoided.
- If the surface becomes dented, apply an iron at low heat through a handkerchief or thin cloth.

* Note that some dents cannot be removed completely. Avoid using a hot iron or ironing for a prolonged period, as this can cause the product to melt.

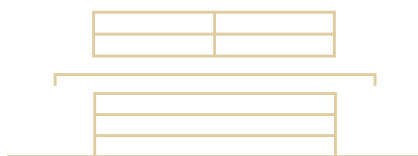

Other

- Never place a hot iron, kettle or pan directly on the product or aim hot air (e.g. from a hair dryer) directly at the product.
- Do not allow a lit cigarette to come into contact with the product.
- Wipe spills such as kerosene immediately to prevent fires or swelling damage to the product.

[Important information about floor mats] • The product is designed to be laid directly onto a hard floor. It is not intended as a substitute for conventional installed tatami matting. • The product contains plastic which may melt in the presence of an iron or other concentrated heat source. • Do not use the product on a heated floor. Heat buildup can cause deformation and/or degradation of flooring. • Do not place heavy objects or concentrated weight points (such as chair legs) directly on the product as deformation can occur. • Product should be used on a flat floor free of ridges, steps and bumps. • Do not treat the product roughly or allow it to fall onto a corner edge. • Treat the non-slip soft base with care to prevent damage. • To prevent accidents, do not jump or slide onto the product. • To prevent accidents, take care when walking across the product. • The product is designed to resist discoloration and staining. Nevertheless, dirt and stains should be wiped off immediately using a damp cloth. • Occasionally clean the underneath of the product to prevent buildup of contaminants or liquids that could contribute to mold growth. • Store flat when not in use.

◇ This is not a medical product. Sekisui provides no guarantees whatsoever in relation to health and hygiene issues.

• Correct as of May 2014. • Product colors may differ slightly from printed colors. • Specifications subject to change without notice. • Inquire about custom orders.

TATAMI MODERN STYLE

SHOW-ROOM Visit the Sekisui show-room to see Migusa tatami products on display.

The Sekisui show-room houses a model home featuring Migusa floor mats, the new earth color and SUCRÉE collections for modern living rooms, as well as a full range of color samples. The living room display has a choice of two spaces to help you choose the right color and pattern combination for your living room. Tatami mats in a variety of colors are on display, so come on in and try it out.
